SUMMARY

Highly motivated and results-oriented tech enthusiast with a strong curiosity to learn and explore emerging technologies. Possesses a growth mindset and thrives in challenging environments, consistently seeking opportunities to expand knowledge and contribute to innovative projects. Proven ability to deliver on project goals through strong collaboration with clients & cross-functional teams. Detail-driven with a commitment to industry standards.

TECHNICAL SKILLS

Languages: Java, Python, Kotlin, JavaScript
Framework: Spring Boot, Django.
Datebase: MSSQL, PostgreSQL, Oracle DB
Libraries: React.
Tools: Docker, Kafka, Jenkins, Git, Jira, Trello, GitHub Actions.

EXPERIENCE

Sankey Solutions | Solution Analyst | Thane, Maharashtra, IN

Sampravah (Tata Motors.)   *Jun 2024 – Present*
Tech Stack: *Django, React, PostgreSQL*

- Developed a comprehensive dashboard application, enhancing visibility and oversight across Tata Motors plants.
- Created multiple user-specific reports and dashboards, enabling personalized access to information.
- Improved process efficiency by 40% through real-time analytics and performance tracking.
- Facilitated detailed process information access for upper management, improving decision-making and operational transparency.
- Delivered a user-friendly interface, ensuring easy adoption and minimizing training requirements.

Product Configurator (Tata Motors.)   *Dec 2022 – Present*
Tech Stack: *Django, React, PostgreSQL*

- Designed and implemented a Product Configurator solution for Tata Motors to meet new standards (IPMS 4.0 and MES 4.0).
- Leveraged technology to create a comprehensive manufacturing recipe, ensuring standardized processes.
- Engineered solutions for seamless integration into Tata Manufacturing plants with minimal modifications.
- Developed a digital recipe application for car manufacturing, streamlining operations based on plant-specific needs.
- Implemented a digital sequencing system for efficient assembly, reducing line stoppages by 80%.
- Established centralized configuration management, enabling scalability and consistency across.
- Leveraged cutting-edge technology to develop a comprehensive recipe for manufacturing cars, ensuring adherence to standardized processes.
- Engineered solutions that can seamlessly integrate into Tata Manufacturing plants across India with minimal initial modifications.

Corporate Governance (National Stock Exchange of India Ltd.)
Tech Stack: *Spring Boot, Angular, Oracle*   *Aug 2022 – Nov 2022*

- Spearheaded a Corporate Governance overhaul focusing on transparency and accountability.
- Implemented governance frameworks adhering to regulations and international standards.
- Developed and enforced policies for ethical standards, risk mitigation, and compliance.
- Enhanced investor confidence and market integrity through robust governance mechanisms and comprehensive audits.
- Defined clear roles and responsibilities to ensure effective decision-making and organizational oversight.

PROJECTS

Expense Tracker, Spotify Downloader, WhatsApp Message, Library Management

EDUCATION

- **Shivajirao S. Jondhale College of Engineering**   *Mumbai, India*
  Bachelor of Engineering in Computer Engineering - CGPA 7.83   *2018 – 2012*
- **S. H. Jondhale Polytechnic**   *Mumbai, India*
  Diploma in Computer Technology - 76.29 %   *2013 – 2018*
